Hard-wearing & resistant

Decorative surface suited
to all types of doors

- Multi-purpose and robust material suitable for all project types
- Very resistant for high circulation areas
- Quick and easy cleaning (non-porous surface).

- Anti-bacterial surface guaranteeing the destruction of 99.9% of bacteria
- Low-emission substrate, VOC A+ French classification
- Fire retardant grade in high pressure laminate for fire doors available on request.

- All decors include a protective film coating at no extra cost.
- 100% Complementarity - additional sizes, textures, and structures are also available.
- The UK offer is stocked in depth by International Decorative Surfaces and available for nationwide delivery within 24 to 48 hours.
- Further products from the full range of over 100 door decors are available from stock for UK delivery within 2-3 weeks.

Contains biocidal substance
Silver phosphate glass

Sanitized®

Polyrey's antibacterial Sanitized® treatment comes as standard* and eliminates 99,9% of surface bacteria**.

*Touch finish has inherent antibacterial properties and does not need the Sanitized® label.
